

## MS-200 WHEAT STRAW MOWER

### MS-200 小麦秸秆粉碎机

- Flail mower MS200 is used in agriculture for shredding straw (wheat, barley, rice, soy ...).
- System with straight knives and counter knives with small clearance ensures safe and high quality cutting of straw on only 2-3 cm in length.
- Deflectors allow uniform dispersion of straw mass on surface.
- Support wheels as standard. 16x6.5-4pty wheel, used for adjusting cutting height.
- Rotor with more than 2960 min-1. Aforementioned ranks flail mower MS 170 far ahead of the competition.
- Special antiwind technology

Model	MS 200
Technical data	
Working width [cm]	200
Machine Width [cm]	220
Power requirments [kW/HP]	50-70
