

WOOD CHIPPER

BXR HYDRAULIC TRACTOR WOOD CHIPPER

BXR 型液压喂料碎木机

Perfect for those clean –ups after a storm, pruning or just processing general gardening wastes. Creating mulch for garden plants and tress for conserving water.

Features :

- At the heart of the BX chipper is an oversize heavy duty rotor and reversible chipping blades. The large diameter rotor has a faster tip speed for improved chipping action and the heavy gauge steel keeps your momentum to power through 10" diameter tree trunks. The reversible blades are precision cut tool steel and hardened, keeping a sharp cutting edge and maximizing the performance of the chipper
- The hydraulic-feed hopper is designed to angle the brush against the rotor and blades, pulling the branches into the chipper.
- Easily control where you want the chips with the double adjustable. Exit chute. The chute swivels 360 degrees and the top deflector adjusts the distance.

Maximize your chipping with the aggressive hydraulic feed hopper. Chipping becomes effortless when you let the rotating teeth do all the work. As the brush is fed into the chipper, you can be ready with the next piece.
